Copenhagen Centre on Energy Efficiency

- is a research and advisory institution dedicated to accelerating the uptake of energy efficiency policies, programmes and actions globally
- serves as Sustainable Energy for All (SEforAll's) Energy Efficiency Hub and supports doubling the global rate of energy efficiency improvement by 2030

Key Focus Areas

- Assisting policy change in countries and cities
- Accelerating action through innovative delivery models
- Raising the profile of Energy Efficiency
**Debbie Weyl** is the Manager, Building Efficiency with the WRI Ross Center for Sustainable Cities. She manages the Building Efficiency Accelerator, a global partnership to accelerate building energy efficiency in cities around the world. Prior to WRI, Debbie worked for 5 years at CLASP to improve globally the environmental and energy performance of appliances, lighting and equipment, and for 2 years at the U.S. Department of Energy on energy efficiency programs in the United States.

**Dr. Wee Kean Fong:** Senior Associate and Global Lead for TRAC City Project under the Global Climate Program and WRI Ross Center for Sustainable Cities at World Resources Institute that promotes data-driven city climate actions. TRAC City supports cities to set ambitious and measurable greenhouse gas reduction targets, plan and implement transformative actions to reduce emissions, and measure greenhouse gas performance consistently and transparently using standardized methodologies.

**Carley Chavara** is a Research Analyst with the Global Climate Program. She supports cities in tracking and reducing greenhouse gas emissions through publication development, e-learning, and application of the GHG Protocol for Cities (GPC). Carley also works with the Building Efficiency Accelerator to conduct emissions assessments of policies and projects and draft publications.
Knowledge Management System

The Copenhagen Centre's Knowledge Management System (KMS) engages stakeholders in energy efficiency initiatives through knowledge sharing and outreach. The KMS provides users with access to selected information, reports, publications, and databases on energy efficiency. The KMS is linked to many other energy efficiency initiatives.
