Aggregation of small-scale projects into a sole high-scale project to enhance economies of scale
Aggregation of local projects

- Analysis of SECAPs
- Grouping of local projects
- One business model, legal study and technical assessment
A bundling financial tool that allows for the joint implementation of local projects included in the SECAPs.

- Managed by local governments and exclusively dedicated to climate action.
- Currently formed by 21 municipalities.
• **Local Governments**: trustors and beneficiaries.

• **Mayors Council**: decision-making body.

• **Executive Secretary of RAMCC**: resources, contributions and support to develop projects and programmes.

• **Municipal Bank of Rosario**: trustee
